ABOUT ME

Jorge Humberto
González Hernández

Guadalajara, Jalisco, México
29/03/1982

My name is Jorge González. I am a post producer and animator of motion graphics and a generalist 3d animator. I specialize in CGI digital shots and 3d product animation. I already have more than 20 years of experience, which have given me great ability to solve different graphic needs, I also really like branding and all audio visual work, I am looking for an opportunity with a TN work visa outside of Mexico because here every day is less safe for my family and I feel the need to have a better quality of life so regardless of the job I will move, I really like the challenges of each client, of each company and taking each brand with which I work one step forward in its visual image projection with the knowledge that I like to increase as time goes by.

I hope we can meet in an interview, I wish you have a great day and I leave here my link to my website where this part of my work is and also links to my social networks.

I send you a big greeting and thank you very much for your time.
